PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building a multi-tenant business platform at Syncronova Ai and collaborating remotely with an Australian team. Skills in React, Node.js, Flutter and SQL, supported by mobile, database and AI research projects. Seeking an Associate Software Engineer opportunity.

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Syncronova Ai

Late 2025 – Present

Remote · Australia / Sri Lanka

- Develop and maintain frontend and backend features for a multi-tenant platform serving a commercial flower farm business.
- Implement subscription-management and tenant-branding modules using React, Node.js, Vite and Tailwind CSS.
- Work with PostgreSQL for relational data and Docker for application deployment.
- Collaborate with an Australian engineering team to clarify requirements, troubleshoot issues and deliver product enhancements.

TECHNICAL SKILLS

Programming: JavaScript, Java, C#, Dart, Python, SQL, HTML, CSS

Web & mobile: React, Node.js, Vite, Tailwind CSS, Flutter, ASP.NET, Java Servlets

Databases & cloud: PostgreSQL, MySQL, Microsoft SQL Server, Firebase Authentication, Cloud Firestore

AI research: TensorFlow / Keras, TensorFlow Lite, convolutional neural networks

Tools: Git, Docker, Postman, Figma, VS Code, Android Studio

EDUCATION

BSc (Honors) in Software Engineering

2022 – 2026

NSBM Green University

Professional English Competency Course

April 2026

NSBM Green University · Completed

GCE Advanced Level

2020

Gankanda Central College

SELECTED PROJECTS & RESEARCH

SkinSafe — Final-Year Research Project

Project details

Flutter, Dart, TensorFlow Lite, Python / TensorFlow, Firebase

- Developed a working mobile research prototype for skin-awareness and screening support, combining guided photo capture, image-quality checks and on-device CNN inference.
- Implemented lesion history, previous-image comparison, 3D body references, follow-up reminders and location-based UV forecasts.
- Integrated Firebase Authentication and account-scoped Firestore metadata while keeping raw photos on the device.
- Used Python and TensorFlow for model training and TensorFlow Lite export to support inference within the Flutter application.

Do.lk — Digital Freelance Marketplace

GitHub repository

Flutter, Dart, Firebase, MySQL

- Built a mobile marketplace connecting Sri Lankan service providers with customers.
- Implemented service browsing, seller profiles, messaging interfaces, service packages and order-review screens.

Hardware Shop Database & BI

ADBMS group project

Microsoft SQL Server, SQL, WAMP Server, ER / EER modelling

- Collaborated on ER/EER modelling and normalisation to 3NF, with SQL DDL/DML, views, sequences, stored procedures, triggers and integrity constraints.
- Contributed to a database system covering customer and product management, monthly sales, employee performance and inventory stock-status reporting.

Luxury Wear Store — Auction & Shopping System

GitHub repository

C#, ASP.NET, HTML, CSS, JavaScript, MySQL

- Developed a web-based system supporting product browsing, cart management and transaction workflows with a relational database backend.

ACloth Shop — Shopping Management System

GitHub repository

Java, Java Servlets, HTML, CSS, JavaScript, MySQL

- Built a local-server shopping application with product browsing, cart management, transaction workflows and relational data storage.

LEADERSHIP & ACTIVITIES

- Assistant Head of Media Department, NFORCE Club, NSBM — 2024.
- Organising Committee Member, NSBM Career Fair — 2023 and 2024.
- Member, FOSS Club and IEEE Club, NSBM — 2024.
