YASHIKA KEKULANDALA

Software Engineer | Full-Stack | Java · Spring Boot · Angular

4.5+ Years of Professional Software Engineering Experience

+971 56 396 2854 | kldyukekulandala@gmail.com | linkedin.com/in/yashika-kekulandala | Dubai, UAE

Based in Dubai, UAE — immediately available

SUMMARY

Software Engineer delivering secure, enterprise-grade systems for banking, government, IT services and healthcare clients. Strong backend expertise in Java, Spring Boot, and Microservices architecture, combined with frontend development in Angular and TypeScript. Skilled in API management (WSO2 APIM/IS, OAuth2, JWT), event-driven integration (Kafka, RabbitMQ), and full Agile delivery cycles in production environments. Experienced across core banking, open banking, and enterprise data migration projects — delivered concurrently across multiple client engagements, including leading BPMN workflow automation initiatives and building secure API management layers. Dubai-based with immediate availability, seeking full-stack or backend engineering roles within UAE banking, fintech, or enterprise technology companies.

TECHNICAL SKILLS

Backend & Frameworks: Java, Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Microservices, REST APIs, OOP, Multithreading/Concurrency, Data Structures

Frontend: Angular, TypeScript, HTML5, CSS3, JavaScript

API & Integration: WSO2 APIM, WSO2 IS, OAuth2, JWT, Kafka, RabbitMQ, BPMN (Activiti / RedHat), Payment Gateway Integration

Databases: Oracle, PostgreSQL, MySQL, Liquibase

DevOps & Tools: Docker, Jenkins, Git, GitLab, GitHub, SVN, CI/CD

Methodologies: Agile, Scrum, SDLC, Jira

EXPERIENCE

Software Engineer — Inova IT Systems (Pvt) Ltd, Sri Lanka

Jun 2023 – Present

Technologies: *Java, Spring Boot, REST APIs, Microservices, WSO2 APIM/IS, PostgreSQL, Oracle, Docker, Activiti BPMN, Git, Jira, RabbitMQ*

- Enabled faster, independent feature releases across banking, healthcare, and government engagements, measured by reduced deployment coordination overhead, by re-architecting core services into Docker-based microservices
- Secured partner integrations against unauthorized access, measured by full OAuth2/JWT/RBAC enforcement across all API traffic, by building a centralized API management layer with WSO2 API Manager and Identity Server
- Enabled reliable, high-volume data flow across enterprise systems, measured by consistent event-driven processing at scale, by implementing Kafka and RabbitMQ messaging pipelines
- Eliminated manual bottlenecks in enterprise data migration, measured by streamlined end-to-end workflow completion, by leading BPMN automation initiatives using Activiti BPMN
- Delivered secure, production-ready RESTful APIs for banking, healthcare, and government clients simultaneously, measured by successful concurrent go-lives across sectors, by designing services in Java/Spring Boot to each client's compliance requirements

Associate Software Engineer — Inova IT Systems (Pvt) Ltd, Sri Lanka

Aug 2022 – Jun 2023

Technologies: *Java, Spring Boot, REST APIs, Oracle DB, PostgreSQL, Angular, GitLab, Jira, Agile*

- Improved system stability and release turnaround time, measured by faster defect resolution cycles, by triaging and resolving production change requests and bugs
- Strengthened backend reliability for health and government production systems, measured by improved module stability, by developing and enhancing Java/Spring Boot services
- Enabled consistent data access across systems, measured by stable API-to-database integration, by building and integrating RESTful APIs against Oracle and PostgreSQL
- Maintained on-schedule, high-quality releases, measured by reduced cross-team rework, by partnering closely with QA and frontend teams throughout the release cycle

Trainee Software Engineer — Inova IT Systems (Pvt) Ltd, Sri Lanka *Mar 2022 – Aug 2022*

Technologies: *Java, Spring Boot, REST APIs, SQL, Angular, Git, Jira, Agile*

- Delivered functional REST APIs for enterprise web applications, measured by passing QA test cycles, by developing and testing endpoints under senior engineer guidance
- Supported successful sprint delivery, measured by consistent backend-frontend integration across releases, by contributing to Agile development cycles
- Improved data accuracy across system modules, measured by reduced data inconsistencies, by validating and cleaning records through SQL query development

KEY PROJECTS

All projects below were delivered concurrently as client engagements while at Inova IT Systems, spanning banking, government, healthcare and utility sectors.

PULSE — IT Service Management Platform *Dec 2024 – Present*

- Replaced a legacy CRM with a modern ITSM platform, measured by successful migration of enterprise service data, by leading platform build-out and workflow automation

Technologies: *Java, Spring Boot, PostgreSQL, Activiti BPMN, Docker, Kafka, RabbitMQ, Jenkins*

LOLC FusionX — Core Banking Platform *Mar 2024 – Dec 2024*

- Supported enterprise-scale financial operations, measured by reliable core banking transaction processing, by contributing to a next-generation core banking platform

Technologies: *Java, Spring Boot, REST APIs, Oracle DB, Liquibase, RedHat BPMN, Angular, Jira, Agile*

Durdans Hospital Mobile Application | Healthcare *Jan 2024 – Jun 2025*

- Enabled secure in-app payments for hospital staff and patients, measured by successful payment gateway transactions, by building backend services for the mobile application

Technologies: *Java, Spring Boot, REST APIs, MySQL, Payment Gateway*

Open Banking — Smart Addressing Module | Bank of Maldives *Jan 2023 – Dec 2024*

- Enabled secure third-party access to customer financial data, measured by compliant open banking data exchange, by delivering the smart addressing module via WSO2

Technologies: *WSO2 APIM, WSO2 ESB, WSO2 IS, Java, REST APIs, OAuth2, MySQL, Docker*

Employees' Trust Fund Board (ETFB) System | Government Sector *Jun 2022 – Oct 2024*

- Streamlined Employees' Trust Fund processing and administration, measured by end-to-end system reliability, by building the enterprise system from the ground up

Technologies: *Java, Spring Boot, REST APIs, Angular, Oracle Database, Microservices*

LECO — Enterprise Utility Management System | Lanka Electricity Company *Jul 2022 – Sep 2024*

- Improved billing accuracy and customer service for a national utility provider, measured by reliable production billing operations, by delivering the electricity billing and customer management system

Technologies: *Java, Spring Boot, REST APIs, Oracle DB, Jira, Agile*

CERTIFICATIONS

WSO2 Certified API Manager Developer - V4 - API Management Profile *Issued Jul 2023*

WSO2 Certified API Manager Practitioner - V4 - API Management Profile *Issued Feb 2022*

EDUCATION

BSc. (Hons) Computer Science and Software Engineering
University of Bedfordshire, UK
First Class Honours
